

Bonded uplink and downlink scenario

/30 routed to ADSL1

/30 routed to ADSL2

Block routed to both via Firebrick to both links

Outgoing traffic sent via both ADSL lines, FireBrick switches to one if other fails.

Incoming traffic sent via both ADSL lines, FireBrick switches to one if other fails.

Downlink 4Mb/s normally, 2Mb/s if one line fails

Uplink 500Kb/s normally, 250Kb/s if one line fails
